***Response to Amendment***

Examiner has entered the amendments to the specification and claims. Claims 1-5, 8-14 are being considered.

***Drawings***

1. Figure 6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Allowable Subject Matter***

1. Claims 1-5 and 8-14 are allowed.

The primary reason for allowance of claims 1-6 and 8 is the inclusion of a judging means that judges that the toner residual amount is insufficient when a number of times that the output of said sensor is less than the reference value within a predetermined detection time exceeds a reference number of times, which is found in all of claims 1-6 and 8, but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 9-14 is the inclusion of a judging means that

judges that the toner residual amount is insufficient when a reference rate with respect to an output from a sensor is less than the reference value exceeds a reference rate value, which is found in all of claims 9-14, but not disclosed nor suggested by the prior art of record.
